SUMMARY

Full-Stack Software Engineer with **2+ years of experience** designing and building scalable web applications using **Python, FastAPI, React, TypeScript, and PostgreSQL**. Experienced in **REST API development, Dockerized deployments, Google Cloud Platform (GCP), GitHub Actions, and Agile/Scrum** software delivery. Skilled in developing **AI-enabled applications** through **Retrieval-Augmented Generation (RAG)** and **LLM** integration.

EXPERIENCE

Software Engineer

TagSkills EdTech Pvt. Ltd.

January 2026 – Present

Bangalore, Karnataka, India

- Delivered **5+ end-to-end platform features** using **Python, FastAPI, React, TypeScript, and PostgreSQL** across learner-facing and administrative web experiences.
- Developed and integrated **5+ REST API** endpoints connecting frontend workflows with backend services, database operations, and application logic.
- Developed a **Retrieval-Augmented Generation (RAG)** assistant using FastAPI, PostgreSQL (**pgvector**), and **Google Gemini** to deliver context-aware responses from educational content.
- Built reusable **React/TypeScript** components and responsive interfaces to improve consistency and maintainability.
- Designed **PostgreSQL** schemas and implemented backend workflows supporting platform functionality, content management, and application operations.
- Assisted in **Dockerized** application deployments on Google **Cloud Platform (GCP)** and contributed to automated build and release workflows.

Python Developer

Indotronix International Corporation

August 2024 – September 2025

Richmond, VA, USA

- Collaborated within a **6-person cross-border Scrum pod** across **US and India** engineering teams to maintain and enhance enterprise provisioning workflows.
- Engineered **5+ REST API** endpoints using **Python** and **FastAPI** to automate provisioning operations and streamline internal platform workflows.
- Designed and optimized **PostgreSQL database models** and queries, enabling reliable management of provisioning data, user workflows, and application state.
- Built backend services with robust **validation, exception handling, and business logic layers** to improve application reliability and maintainability.
- Configured and optimized multi-stage **Docker** builds, reducing runtime image size to **under 150MB**, and automated deployments to **GCP Cloud Run** via **GitHub Actions** workflows.
- Built an asynchronous regression testing framework using **PyTest**, maintaining the engineering team's mandatory **85%+ code coverage** standard.

Web Development Intern

ParvaM ConsultTech Pvt. Ltd.

April 2021 – August 2021

Bangalore, Karnataka, India

- Contributed to responsive web development using **HTML, CSS, JavaScript, PHP, and MySQL** for a client-facing furniture business website while collaborating through **Git-based version control workflows**.
- Assisted in implementing frontend **UI** enhancements and backend **CRUD** functionality supporting core application workflows.
- Participated in testing, debugging, and feature enhancements within an **Agile** development environment.

EDUCATION

Portland State University

Master of Science in Computer Science

Portland, OR, USA

September 2022 – March 2024

Visvesvaraya Technological University

Bachelor of Engineering in Information Science

Bangalore, Karnataka, India

August 2016 – October 2020

SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Backend: FastAPI, Node.js, REST APIs

Frontend: React.js, HTML, CSS

Databases: PostgreSQL, MySQL, pgvector

Cloud & DevOps: Google Cloud Platform, Docker, GitHub Actions, CI/CD pipelines

AI Engineering: RAG, LLM Integration, Google Gemini

Methodologies: Agile/Scrum
