SUMMARY

Full-Stack Software Engineer with **2+ years of experience** designing and building scalable web applications using **Python, FastAPI, React, TypeScript, and PostgreSQL**. Experienced in **REST API development, Dockerized deployments** on **Google Cloud Platform (GCP)**, **CI/CD** via **GitHub Actions**, and **Agile/Scrum** delivery. Skilled in developing **AI-enabled applications** through **Retrieval-Augmented Generation (RAG)** and **LLM** integration.

EXPERIENCE

Software Engineer

January 2026 – Present

TagSkills EdTech Pvt. Ltd.

Bangalore, Karnataka, India

- Built and delivered **5+ end-to-end platform features** (**FastAPI, PostgreSQL, React/TypeScript**) across learner-facing and administrative experiences.
- Designed and built a **REST API layer (5+ endpoints)** connecting frontend workflows to backend services, database operations, and business logic.
- Designed and shipped a production **Retrieval-Augmented Generation (RAG)** assistant (**FastAPI, pgvector, Google Gemini**) end-to-end, introducing the platform's first context-aware Q&A capability over educational content.
- Built a reusable **React/TypeScript** component library, establishing UI consistency and reducing duplicate frontend work.
- Designed **PostgreSQL** schemas and implemented backend workflows supporting content management and core platform operations.
- Containerized and deployed applications on **Google Cloud Platform (GCP)**, contributing to automated build and release pipelines.

Python Developer

August 2024 – September 2025

Indotronix International Corporation

Richmond, VA, USA

- Operated within a **6-person cross-border Scrum pod** spanning **US** and **India** engineering teams, maintaining and extending enterprise provisioning workflows.
- Engineered **5+ REST API endpoints (Python, FastAPI)** automating core provisioning operations and internal platform workflows.
- Designed and optimized **PostgreSQL** database models and queries, enabling reliable management of provisioning data, user workflows, and application state.
- Built backend services with robust **validation, exception handling, and business logic layers** to improve application reliability and maintainability.
- Configured and optimized multi-stage **Docker** builds, cutting runtime image size to **under 150MB**, and automated deployments to **GCP Cloud Run** via **GitHub Actions**.
- Built an asynchronous regression testing framework (**PyTest**) from the ground up, establishing the team's **85%+ code coverage** standard as a merge gate.

Web Development Intern

April 2021 – August 2021

ParvaM ConsulTech Pvt. Ltd.

Bangalore, Karnataka, India

- Contributed to responsive web development using **HTML, CSS, JavaScript, PHP, and MySQL** for a client-facing furniture business website, collaborating through **Git-based version control** workflows.
- Assisted in implementing frontend **UI** enhancements and backend **CRUD** functionality supporting core application workflows.
- Participated in testing, debugging, and feature enhancements within an **Agile** development environment.

EDUCATION

Portland State University

Portland, OR, USA

Master of Science in Computer Science

September 2022 – March 2024

Vivesvaraya Technological University

Bangalore, Karnataka, India

Bachelor of Engineering in Information Science

August 2016 – October 2020

SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Backend: FastAPI, Node.js, REST APIs

Frontend: React.js, HTML, CSS

Databases: PostgreSQL, MySQL, pgvector

Cloud & DevOps: Google Cloud Platform, Docker, GitHub Actions, CI/CD pipelines

AI Engineering: RAG, LLM Integration, Google Gemini

Methodologies: Agile/Scrum
